

IMPORTANT: ACTION REQUIRED

Comcast is enhancing its digital services!

You currently receive Comcast Expanded Basic cable service through the agreement your property owner/manager/association has with Comcast, and we will be improving those services by bringing digital quality and sound to your community.

In order for Comcast to deliver the enhanced services Comcast will no longer be transmitting in analog format. **This means you will need a digital cable device for each TV on which you wish to continue receiving those channels.**

It's easy to be prepared!

Stop by the **Comcast Booth on October 5th thru October 10th between 2:00pm – 8:00pm located at the Clipper Club Lobby Area, 5 Captain Dr. with your Driver's License.** Comcast's onsite staff will provide you with the equipment you need, along with simple instructions to complete the activation. Comcast will provide you up to 3 digital adapters at **NO ADDITIONAL CHARGE.**

If you are unable to attend the event on 10/5 -10/10/09, please call 800-856-2374 and we will make arrangements. Standard rates apply for professional installations.

If you choose not to get a digital device on any TV, that set will continue to receive Comcast service, but only the Limited Basic service channels 2-34.
